

FDP on Recent Advances in Chemical Engineering

Report

This Faculty Development Program was organized by Department of Chemical Engineering HBTU, Kanpur under the World bank Project TEQIP III. This program was a 5-day program with several interesting presentations about recent advances in the field of chemical engineering. Dr. Ashwini Sood was the coordinator of this FDP. The technologies in the field of chemical engineering are evolving by every day. The chemical industry is evolving with these evolving technologies. The recent advances in the field of carbon reduction were the focus of this FDP. The knowledge sharing between different department of School of Chemical Technologies has also been taken place through the expert lectures from different departments. The faculty members of HBTU Kanpur, AITH, Kanpur and CSJM Kanpur were participated in this FDP. The duration of this program was from 23rd July to 27th July 2018
