100 YEARS
1921 - 2021

5.2.3 : Percentage of recently graduated students who have progressed to higher education (previous graduating batch)

5.2.3.1 : Number of outgoing students progressing to higher education

- Number of outgoing students progressing to higher education: **31**
- Total number of final year students: 661
- Percentage of recently graduated students who have progressed to higher education: 4.69%

Current graduating batch (2021-2022) is still in progress therefore considering previous graduating batch as (2020-2021), so

- Number of outgoing students progressed to higher education=31
- Total number of final year students: 571

Therefore, percentage of graduated students progressed to higher education should be $(31/571) = 5.43\%$

Considering the delay in academic session and declaration of results prevailing COVID conditions the data for Student Progression to higher education is provided for graduating batch of 2020-21. Also, the admissions for the current academic session is still ongoing, therefore the details of the students progressed for higher education from the current graduating batch i.e., 2021-22 is unavailable. In view of the above the data is considered for the graduating batch of 2020-21 and accordingly the number of students passed out in 2021 are to be considered in calculating the percentage of student progression to higher education.
