Deadline
November 11, 2022

Who should attend?

- UG, PG and Ph.D. Students
- Faculty and Technical Staffs
- Scientist from R&D Labs
- Industry Persons

ABOUT THE WEBINAR

- The biotechnology industry is one of the fastest growing knowledge based sectors. Promotion of the Indian biotechnology sector is also high on the policy agenda of the Government of India and It has been recognized as one of the key priority sectors under the 'Make in India', 'Skill India' and 'Start-up India' initiative of the Government of India, being one of the few sectors on strong growth trajectory to drive sustainable economic growth and generate large scale employment opportunities.
- Entrepreneurship based on innovation has immense growth potential. Given this context, encouraging and promoting self-employment as a career option for young people will be of highest importance.

All participants are required to fill the Google form via following link:

Webinar Timeline

Inauguration
09:30-10:00

Session I (10:00 AM – 11:15 AM)

Mrs Tanu Singh
Department of Humanities and Applied Sciences
HBTU Kanpur

Session II (11:15 AM – 12:45 PM)

Prof. Purnendu Ghosh
Executive Director
Birla Institute of Scientific Research (BISR), Jaipur

Session IV (12:45 PM – 02:00 PM)

Mr Mahendra Kumar
Plant manager
PI Industries

End of Session

The screenshot shows a Google Meet session in progress. The main content area displays a slide titled "One-Day Webinar On Entrepreneurs' Development in the Area of Biotechnology (EDAB'22) November 12, 2022". The slide is organized by the Department of Biochemical Engineering, School of Chemical Technology, Kanpur-208002. The "Webinar Timeline" slide is also visible, showing the schedule for the day. On the right, a grid of participants is shown, including Shashikant Be, Anurag Pal, Mayank Dhar Pandey, Shruvan Kumar, Dilip Kumar BE, and A.K. Jain. The bottom status bar indicates the time is 9:37 AM on 12-11-2022.

Slide Content:

Why Industry Turns to Biotechnology

- Is it possible to improve my current process, or a competitor's process, by using biotechnology?
- Do I have to change the entire process or just one step?
- Can I use conventional organisms or biocatalysts or do they need to be genetically manipulated?
- Is my process cleaner than the other
