NO SUGGESTIONS

Everything is good but some infrastructure of syllabus to change according to the future

All good

The University and it's faculty are doing the best.

Good collage

Practical Teaching Skills are very bad in Mechanical Engineering Department. Teacher follows the process of Rote learning like (in Schools). I think teachers/institute should be more focused on Practical skills rather than rote learning and this can improve time to time. Above mentioned problems are main problem that I am facing from 2 years and one more thing internal/external evaluation by the teachers was not up to the mark teacher can atleast pass

the student if he has written answer related to topic. I think there should be different panel of members for re-evaluation of failed students answer copy .Failing/Back in every subject results in can increase dropped out from the University and this can effect overall grading of university. Some Teachers in Mathematics department and Mechanical Engineering department have very egoistic and rude behaviour university administration have to strict legal action against them. If anyone willing to know their names please call me.
