

FDP on Methods and Techniques for Enhanced Teaching and Learning in Technical Education

Report

The workshop of enhancing the teaching learning practice in technical education was organized by Department of Chemical Engineering from 15th to 20th October 2018. Dr. S. K. Gupta, Head chemical Engineering was the organizing secretary of the FDP. The evolving technology and the spread of internet is changing the teaching learning practice globally. The first day of this workshop was on the outcome-based teaching practices. The second day was focused on blended teaching learning methodology. On third day, flipped classroom teaching learning practice was discussed. The fourth day was focused on experiential learning using virtual labs. Fifth day was a practice session on using online tools for enhanced teaching methodologies. The faculty members of Department of Chemical Engineering and other departments of School of Chemical Technology have participated in the FDP.
